Maintaining Peak Performance

Services

- Operations
- Maintenance
- Overhaul
- Troubleshooting
- Warranty Support
- Rapid response
- Quality control
- Major component change out
- MET Data Towers
- Blade cleaning
- Inspections

Run your per diem costs down to zero

Rapid expansion in strategic locations ensures run energy can quickly deploy wind professionals to sites saving you:

- time • money • anxiety

In fact, in some locations the more contracts you run, the lower your per diem costs.

If your project is near to a run energy base, you could reduce per diem costs to zero.

No more paying for accommodation, meals or transportation to bring people to site.

This could potentially save you hundreds of thousands of dollars.

Wind Prospect has partnered with wind turbine maintenance specialist run energy, to provide a complete operations and maintenance package for wind turbines worldwide.

The run energy Operations and Maintenance team offer a premier service to achieve maximum availability from your facilities whilst maintaining safety at the core of every business activity.

Wind Prospect and run energy bring together sophisticated external monitoring capabilities with regular servicing and the ability to react quickly and efficiently to potential problems.

You can rest assured that a Wind Prospect/run energy contract will ensure your turbines are operating at maximum availability.

The only thing we are yet to control is the wind.

Global service, worldwide resource
